

RUBAN M

Full Stack Developer (Spring Boot + React)

+91 9080363274 | ruban5775@gmail.com

PROFESSIONAL SUMMARY

Associate Software Engineer with **1.9 years** of experience specializing in **React.js** and **Spring Boot** full-stack development, with hands-on experience in REST APIs, Java backend, MySQL, and AI automation workflows built with n8n and Make.com.

EXPERIENCE

Software Developer (Remote)

SEP 2025 – SEP 2026

StartTech Software Solutions – Tamil Nadu

Contributed to frontend development with React.js, JavaScript, HTML, and CSS, integrating **REST APIs** with **Spring Boot** and **MySQL** while supporting application development, testing, debugging, and deployment.

Associate Software Engineer

JAN 2025 – AUG 2025

Tidy Digital Solutions – Salem, Tamil Nadu

Contributed to backend development using **Java** and **Spring Boot**, developing and integrating RESTful APIs with MySQL while supporting application development, testing, debugging, and deployment.

PROJECTS

Adslife – Local Offers & Promotions Platform

- Website: <https://adslife.in/>
- Developed a hyperlocal offers platform **connecting vendors with nearby consumers** through Flutter mobile and React.js web applications, expanding local offer visibility and customer reach.
- Integrated shared backend APIs and database to enable radius-based offer discovery and **targeted push notifications**, helping vendors promote deals to potential **customers within 5–10 km**.

Your Perfect Eventz Management

- Website: <https://www.ypeventz.com/>
- Delivered responsive event management website using **React.js**, TypeScript, Tailwind CSS, PHP, and MySQL, integrating **Cloudinary** media management and a custom admin panel.

Krishna Academy

- Website: <https://thekrishnaacademy.com/>
- Built a responsive educational website using **React.js**, TypeScript, Tailwind CSS, PHP, and MySQL, **integrating workflow automation** for contact enquiry processing and email notifications.

Timesheet – Employee Management Web App

- Developed an employee timesheet and payroll web application using **React.js**, **Spring Boot**, **Spring JPA**, **Hibernate**, and **MySQL**, implementing employee management, timesheet tracking, leave management, **automated payroll processing**, and **PDF payslip generation**

Lead Generation Automation – n8n Workflow

- Built a cost-efficient **n8n workflow for business lead generation**, designed as a **low-cost alternative** to paid platforms such as **Apollo** and **Clay**.
